

DeepShield AI

Explainable Deepfake Detection Report

Report ID: DS-20260817-2784

Prediction	REAL
Confidence	97.64%
Inference Time	0.249 sec
Risk Level	LOW

Original Uploaded Image

DETECT • EXPLAIN • TRUST

AI Reasoning

- Natural skin texture detected.
- Facial symmetry appears consistent.
- Lighting and shadows are realistic.
- Eye reflections look natural.
- No obvious AI-generated artifacts detected.

Model Information

Model	DeepShield CNN
Framework	TensorFlow / Keras
Input Size	224 × 224
Explainability	Grad-CAM

Explainability (Grad-CAM)

Grad-CAM Interpretation

Grad-CAM highlights the image regions that contributed most to the CNN's prediction. Warmer colors (yellow/red) indicate regions that strongly influenced the decision, while cooler colors (blue/purple) contributed less. This visualization improves transparency by showing where the model focused before classifying the image.
